Lesson 1 · Lab Safety and Experimental Design

Name _____ Period ___ Date _____

1. In today's penny lab, what did you change on purpose? (circle) the number of drops · the strength of the alcohol · the kind of penny · the pipette
2. A beaker cracks and glass lands on the floor. Where does the glass end up? (circle) the regular trash · the broken-glass box, swept up by the teacher · the sink · under the bench
3. Write a hypothesis for the penny lab in the form If ... then .... Name the variable you change and the one you measure.
