none of these can do it

U4 · Which Tool · Set 01

A A drop of blood is left on broken glass at a shed. Police want to know whose blood it is.

U4 · Which Tool · Set 01

B A bone from the ice holds only a trace of mammoth DNA. Scientists need enough to study.

U4 · Which Tool · Set 01

C A company wants big tanks of bacteria that make human insulin.

U4 · Which Tool · Set 01

D Doctors want to break the switch gene that turns off fetal hemoglobin in a patient's blood stem cells.

U4 · Which Tool · Set 01

E A scientist wants to check whether a plasmid got bigger after a gene was pasted in.

U4 · Which Tool · Set 01

F Identical twins both visited the scene. Which twin left the hair?

U4 · Which Tool · Set 01

G Farmers want corn plants that make their own caterpillar poison.

U4 · Which Tool · Set 01

H A clinic has a nose swab and needs to know if a virus is in it.
