UNIT 1 EXIT TICKET · LT 1.1 · ADVANCED

Lesson 1 · Why Water Holds Together

Name _____ Period ___ Date _____

1. Draw two water molecules. Label δ+ and δ−, one polar covalent bond (solid line) and one hydrogen bond (dashed line).

2. Your penny held more drops than you predicted. Explain why, using the words **hydrogen bond** and **cohesion**.

3. Use the word **polar** in a sentence that tells why water is polar.

On the back: Why can a person live for weeks without food but only days without water? Your first answer. Keep it.
