Deck A · Water: Property, Example, Cause

Unit 1 · Biochemistry
18 cards + this cover
Label code Bio · U1 · L2 · A
Envelope: U1-A · Set ___ of ___
Lesson 2: lay out the six property headers; place one example and one cause under each.
Print single-sided on light blue cardstock. Count against this card before the set goes back in the bin.
Key: OneDrive Unit 01 › Answer Keys

High heat capacity

Universal solvent

Blue dye climbs a celery stalk to the leaves

example

Cohesion

Capillary action

A drop on a leaky faucet grows big before it falls

example

Water curves up where it touches a glass cylinder

example

Ice floats (density)

Ice cubes ride at the top of a glass of lemonade

example

Water's charged ends are attracted to a different surface

cause

δ+ and δ− ends surround charged and polar particles and pull them apart

cause

A big pot of water takes a long time to boil

example

Freezing locks molecules apart in an open pattern, so fewer fit in a space

cause

Drink-mix powder disappears when stirred into water

example

Sticking to the walls and to itself, water pulls itself up a narrow tube

cause

Hydrogen bonds pull each water molecule toward its neighbors

cause

Bio · U1 · L2 · A · 08/18

Adhesion

Bio · U1 · L2 · A · 12/18

Energy goes into breaking hydrogen bonds before the temperature rises

cause

Bio · U1 · L2 · A · 03/18

Deck B · Four Families of Macromolecules

Unit 1 · Biochemistry
24 cards + this cover
Label code Bio · U1 · L3 · B
Envelope: U1-B · Set ___ of ___
Lesson 3: headers, monomers and elements. Lesson 5 and review: add jobs and examples.
Print single-sided on light blue cardstock. Count against this card before the set goes back in the bin.
Key: OneDrive Unit 01 › Answer Keys

Protein

Bio · U1 · L3 · B · 22/24

Long-term energy storage, insulation, membranes
job

Bio · U1 · L3 · B · 24/24

C, H, O, N, P
elements

Bio · U1 · L3 · B · 11/24

Stores and carries the instructions
job

Bio · U1 · L3 · B · 05/24

Amino acids
monomer

Bio · U1 · L3 · B · 18/24

C, H, O, N (some S)
elements

Bio · U1 · L3 · B · 23/24

An enzyme such as catalase
example

Bio · U1 · L3 · B · 07/24

Carbohydrate

Bio · U1 · L3 · B · 08/24

Quick energy and plant structure
job

Bio · U1 · L3 · B · 03/24

RNA carrying a copy of a gene
example

Bio · U1 · L3 · B · 13/24

C, H, O
elements

Bio · U1 · L3 · B · 09/24

C, H, O (very little O)
elements

Bio · U1 · L3 · B · 12/24

Nucleotides
monomer

Bio · U1 · L3 · B · 01/24

Cellulose in a celery stalk
example

Bio · U1 · L3 · B · 02/24

Starch in a potato
example

Bio · U1 · L3 · B · 04/24

DNA in a chromosome
example

Bio · U1 · L3 · B · 16/24

Olive oil
example

Bio · U1 · L3 · B · 19/24

Speeds reactions, moves, defends, builds
job

Bio · U1 · L3 · B · 21/24

Lipid

Bio · U1 · L3 · B · 20/24

Glycerol and fatty acids
building blocks

Bio · U1 · L3 · B · 17/24

Cholesterol
example

Bio · U1 · L3 · B · 15/24

Hemoglobin in red blood cells
example

Bio · U1 · L3 · B · 14/24

Monosaccharides (simple sugars)
monomer

Bio · U1 · L3 · B · 06/24

Nucleic acid

Bio · U1 · L3 · B · 10/24

Deck C · Unit 1 Word Cards

Unit 1 · Biochemistry
48 cards + this cover
Label code Bio · U1 · L1 · C
Envelope: U1-C · Set ___ of ___
Every lesson: match each word to its meaning, then Say It Without Saying It.
Print single-sided on light blue cardstock. Count against this card before the set goes back in the bin.

Canvas Original #45 · © J. R. Schwebach, CC BY-NC 4.0 · scienceonepagers.org

To lose shape, as a protein does in heat or the wrong pH

Bio · U1 · L1 · C · 27/48

activation energy

Bio · U1 · L1 · C · 03/48

carbohydrate

Bio · U1 · L1 · C · 13/48

The pocket on an enzyme where the substrate fits

Bio · U1 · L1 · C · 17/48

The attraction between a δ+ hydrogen of one molecule and a δ− atom of another

Bio · U1 · L1 · C · 19/48

adhesion

Bio · U1 · L1 · C · 32/48

protein

Bio · U1 · L1 · C · 48/48

Splitting a polymer by adding a water molecule

Bio · U1 · L1 · C · 10/48

Sugars and starches; quick energy and plant structure

Bio · U1 · L1 · C · 34/48

density

Bio · U1 · L1 · C · 37/48

monomer

Bio · U1 · L1 · C · 08/48

A protein that speeds up a reaction without being used up

Bio · U1 · L1 · C · 42/48

The monomer of a nucleic acid: sugar, phosphate and base

Bio · U1 · L1 · C · 22/48

The energy needed to start a reaction

Bio · U1 · L1 · C · 31/48

A chain of amino acids folded into a shape that does a job

Bio · U1 · L1 · C · 36/48

The monomer of a protein Bio · U1 · L1 · C · 30/48	**nucleotide** Bio · U1 · L1 · C · 07/48	**enzyme** Bio · U1 · L1 · C · 05/48	**solvent** Bio · U1 · L1 · C · 29/48
macromolecule Bio · U1 · L1 · C · 43/48	**active site** Bio · U1 · L1 · C · 14/48	**DNA or RNA; stores and carries instructions** Bio · U1 · L1 · C · 46/48	**The molecule an enzyme acts on** Bio · U1 · L1 · C · 09/48
dehydration synthesis Bio · U1 · L1 · C · 25/48	**A substance that dissolves other substances** Bio · U1 · L1 · C · 33/48	**polar** Bio · U1 · L1 · C · 20/48	**capillary action** Bio · U1 · L1 · C · 11/48
How much mass fits in a given volume; ice has less than liquid water Bio · U1 · L1 · C · 02/48	**Water rising up a narrow space by sticking to the walls and to itself** Bio · U1 · L1 · C · 39/48	**lipid** Bio · U1 · L1 · C · 47/48	**One small unit that can join with others** Bio · U1 · L1 · C · 21/48

Joining monomers by removing a water molecule Bio · U1 · L1 · C · 45/48	**Having a slightly negative end and a slightly positive end** Bio · U1 · L1 · C · 18/48	**substrate** Bio · U1 · L1 · C · 40/48	**hydrolysis** Bio · U1 · L1 · C · 23/48
cohesion Bio · U1 · L1 · C · 35/48	**denature** Bio · U1 · L1 · C · 06/48	**A large molecule built from many smaller units** Bio · U1 · L1 · C · 26/48	**nucleic acid** Bio · U1 · L1 · C · 12/48
A long chain of repeating units Bio · U1 · L1 · C · 01/48	**Water sticking to water** Bio · U1 · L1 · C · 41/48	**hydrogen bond** Bio · U1 · L1 · C · 44/48	**polymer** Bio · U1 · L1 · C · 16/48
Anything that speeds up a reaction without being used up Bio · U1 · L1 · C · 04/48	**catalyst** Bio · U1 · L1 · C · 24/48	**Water sticking to a different surface** Bio · U1 · L1 · C · 38/48	**Fats, oils and cholesterol; long-term energy storage** Bio · U1 · L1 · C · 28/48

amino acid
